Muhammad Iqbal

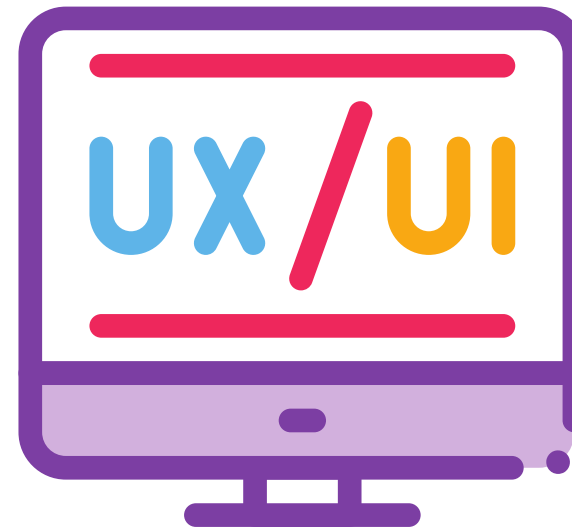

Hi, I'm Iqbal!

I first became interested in computer programming in high school. By the time I go to Telkom University. I already had a firm understanding of Web Developer especially using JavaScript, PHP, Boot Strap and CSS with Laravel framework. Beside of that, I also have an understanding of databases, I am used to using SQL databases, Java and Python programming language, and have basic Back-end programming. I really love writing code and processing data, so it was easy for me to choose my major.

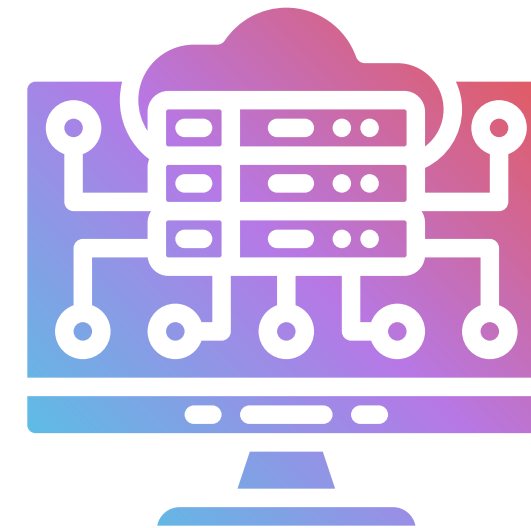

Personal Skills

FRONT-END WEB DEV

UI/UX DESIGN

DATABASE

I used to using php, css, javascript, and laravel framework, mysql database, and familiar with figma to make a mock up design. I'm also used to working with git.
